# How to Use QR Translator

QR Translator is a multilingual service for QR codes. When a QR code generated with QR Translator is scanned with a smart phone or other mobile computing device, the information is displayed in the user's native language.

## How to Use QR Translator

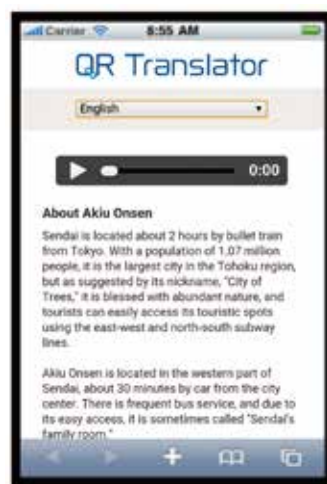

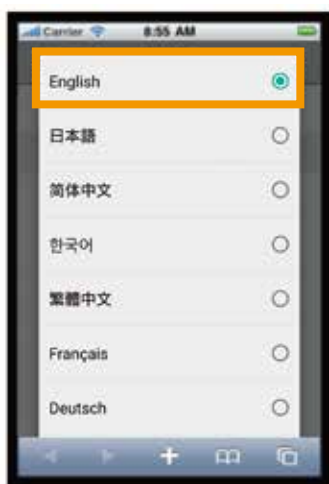

### 1. Scan a QR code

**Scan**  
a QR code!

Use any application on your smartphone or other mobile computing device to scan a QR code created by QR Translator.

### 2. Select a language

Information is displayed in the language set for your device. You can also change the language displayed by selecting a different language as shown in the graphics above.
